widyaanalytic.com

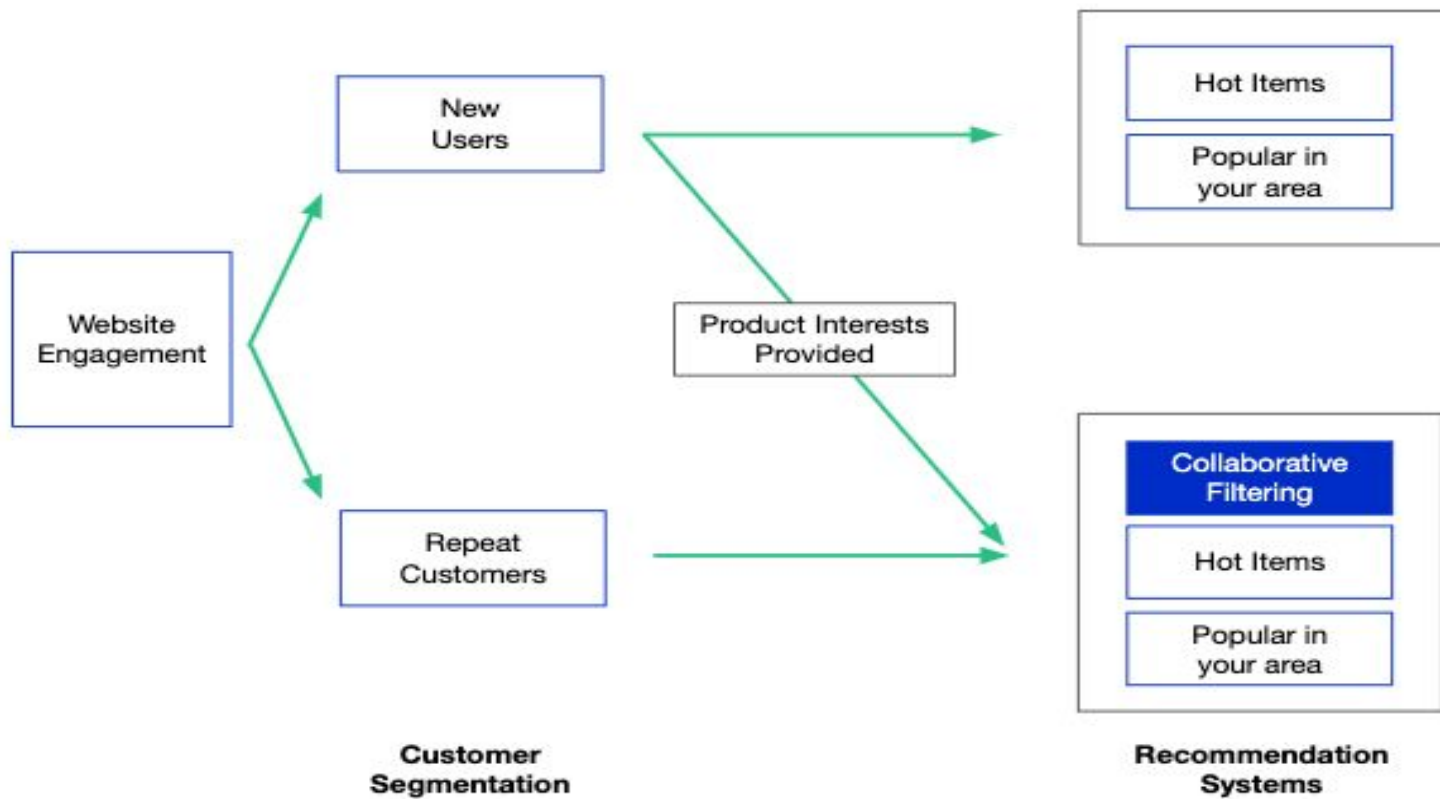

Alan Turing (1950)

I propose to considered the
question, Can machines think?

AI Example: Recommendation System

AI Example: Sentimen Analysis

Neuro Linguistic Programming

Sentiment Analysis

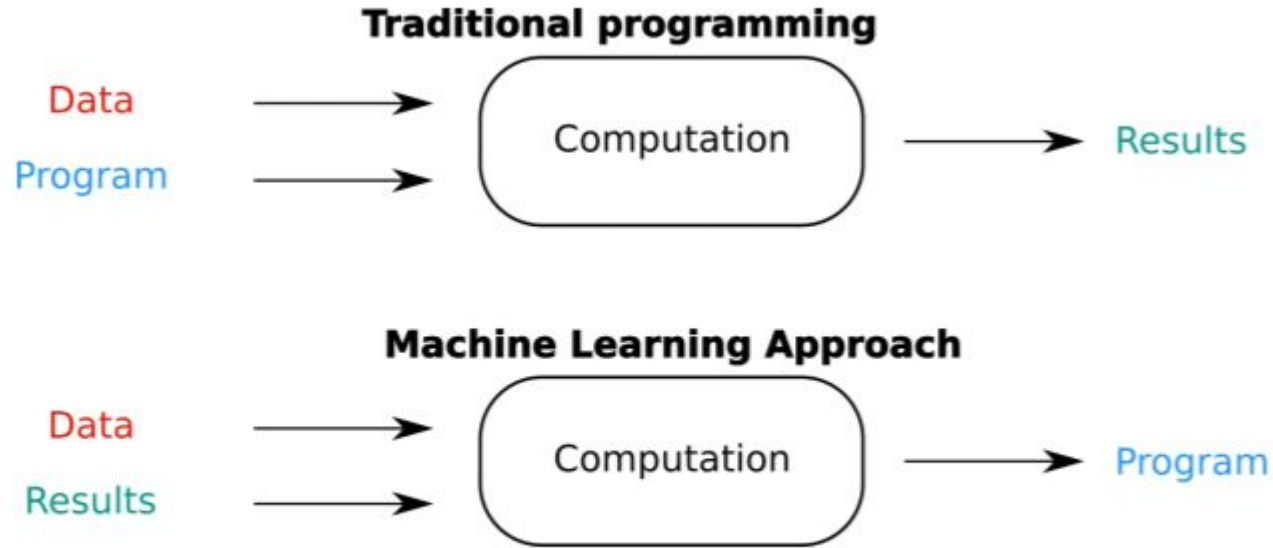

Sentimen Analysis Input Data

Text, Audio, Video, Images

AI, ML, NN, DL ?

Traditional Programming vs ML Programming

Traditional Programming

IF $X > 3.9$ THEN "Cum Laude"

ELSE

"Ga Cum Laude"

ML Programming

IF $X > 3.9$ THEN "Cum Laude"

ELSE

"Ga Cum Laude"

Machine Learning

Unsupervised Learning

- Meaningful Compression
- Structure Discovery
- Feature Elicitation
- Dimensionality Reduction
- Big Data Visualization

Clustering

- Recommender Systems
- Targeted Marketing
- Customer Segmentation

Supervised Learning

- Image Classification
- Customer Retention
- Diagnostics
- Identity Fraud Detection
- Classification

Regression

- Advertising Popularity Prediction
- Weather Forecasting
- Market Forecasting
- Estimating Life Expectancy
- Population Growth Prediction

Reinforcement Learning

- Game AI
- Skill Acquisition
- Learning Tasks
- Robot Navigation
- Real-Time Decisions
